JEMKIRK L. UTANA

09924562100 | jemkirku0907@gmail.com | 4851 B Solchuaga St., Singkamas, Makati City

PROFESSIONAL SUMMARY

Web developer and BS Computer Science student with hands-on experience building practical web systems using Next.js, React, Supabase, PHP, MySQL, and modern deployment workflows. Currently gaining real-world development experience with Officium Inc. / Marajo Group while also building AI, healthcare, productivity, finance, and community-focused portfolio projects. NC III Graphic Design certified, bringing UI layout, visual design, and user-facing presentation skills into software development work.

EDUCATION

University of Makati - BS Computer Science

2025 - 2029 | Makati City

Makati High School - TVL ICT Programming

2023 - 2025 | NC III Graphic Design

EXPERIENCE

Officium Inc. / Marajo Group - Web Developer Intern

2026 - Present

- Developed production-facing web features for Officium Inc. and Marajo Group, supporting frontend and backend tasks across Next.js, Supabase, Vercel, dashboards, booking flows, and responsive UI updates, resulting in stronger real-world full-stack development experience while keeping company details private.

- Assisted with website improvement and deployment workflows, handling implementation checks, layout refinements, and integration-related tasks, resulting in more polished user-facing pages and a clearer understanding of production web maintenance.

Makati Health Department Health Center - Work Immersion Assistant

March 2025 | Makati City

- Assisted patients through the queuing process at Makati Health Department, managing line flow and prescription retrieval support, resulting in smoother patient movement and improved service coordination during work immersion.

- Guided visitors with respectful communication and task follow-through, supporting front-line health center operations and demonstrating practical customer service, organization, and public-facing assistance skills.

Microcadd / TESDA Training - Graphic Design Trainee

April - May 2025

- Designed graphic layouts and basic house-layout outputs using computer-aided design tools, Adobe Photoshop, and Adobe Illustrator, resulting in stronger technical design, attention to detail, and visual production skills.

- Completed design exercises and portfolio-style outputs during training, applying color theory, layout structure, and digital editing responsibilities, resulting in NC III Graphic Design competency preparation.

Hackathon and Web Design Competitions - Participant

2025 - 2026

- Built and presented technical solutions during hackathon and web design competitions, contributing programming, UI layout, teamwork, and problem-solving responsibilities, resulting in stronger time-bound development and presentation experience.

CERTIFICATIONS

- NC III Graphic Design - TESDA, May 2025

- AI Tech 2.0 - Participant, April 2026

- Batang Techno Hackathon - Participant, Batangas State University, March 2026

- InfoTechnOlympics 2025 Web Design Category - Participant, University of Makati, October 2025

PROJECTS

Marajo Group Real Estate Website

- Developed and supported a real estate web platform using Next.js, Supabase, PostgreSQL, and Vercel, handling migration-related work, dashboard functionality, responsive UI, and booking-flow improvements, resulting in production-level experience with modern full-stack deployment and company-facing web systems.

- Assisted with security and workflow improvements including Cloudflare Turnstile integration and booking-system overhaul tasks, reducing friction in user interactions and strengthening form protection for public-facing pages.

Suri.AI - AI Fact-Checking Platform

- Built an AI-powered fact-checking platform for the InterCICSkwela hackathon, developing a Node.js/Express backend proxy integrated with the Claude API, resulting in a working prototype that evaluates claims and surfaces related verified or debunked articles.

- Designed the verification workflow and user-facing interface, managing claim submission, simulated authentication, and related-article display logic, resulting in a clearer misinformation-awareness experience for users.

Personal Portfolio - jemkirk.vercel.app

- Developed a personal portfolio using Next.js, TypeScript, Tailwind CSS, and Vercel, organizing projects, certificates, tech stack, GitHub activity, and resume access, resulting in a professional public profile for showcasing development work.

- Integrated a Gemini-powered chatbot with local portfolio fallback and a canvas-based mini game, managing API routing, UI states, and graceful error handling, resulting in a more interactive visitor experience without exposing private API keys on the client.

PharSayo Medication Management PWA

- Built a healthcare-focused PWA for medication management, handling AI-assisted medication scanning, role-based access, adherence tracking, and dashboard concepts, resulting in practical experience with health-tech workflows and user-centered interface design.

QUACC Child Care Center System

- Developed a community and childcare center system using PHP, MySQL, and Bootstrap, managing admin, staff, guardian workflows, file uploads, password hashing, and OTP verification, resulting in stronger backend and multi-role system design experience.

Assignify

- Designed and built an assignment management web app for schoolwork, routines, and project deadlines, organizing tasks into clear workflow categories, resulting in a more focused productivity experience for students and personal planning.

BasuCash

- Developed a cash-flow and recycling-value tracking project, managing transaction records, expense monitoring, and recyclable-value concepts, resulting in practical experience designing finance-oriented dashboards and community-focused utility tools.
